Section E: Section Wise Performance

Principle 1: Ethics, Transparency and Accountability

Businesses should conduct and govern themselves with Ethics, Transparency and Accountability

1. Does the policy relating to ethics, bribery and corruption cover only the Company?

No. The Company is making continuous efforts in improving the systems and procedures so that they are transparent and in conformity with the extant rules & procedures, thereby ensuring that the working atmosphere and Company's dealings / transactions with other entities are relatively free from corruption. The Company has developed its Code of Ethics and Whistle Blower Policy which pertain to ethics, bribery and corruption. Its Code of Business Ethics governs the manner in which the Company carries out its activities and interacts with its stakeholders.

2. Does it extend to the Group / Joint Ventures / Suppliers / Contractors / NGOs / Others?

Yes. It extends to the Suppliers, Contractors, Business Partners and all other associated entities. The Company is a signatory of ‘Integrity Pact’ with Transparency International India wherein the Integrity Pact is signed between the bidders and the Company for all service contracts valuing Rs.20 crore and above and for all purchase contracts valuing Rs.10 crore and above.

3. How many stakeholder complaints have been received in the past financial year and what percentage was satisfactorily resolved by the management? If so, provide details thereof, in about 50 words or so.

- i) Investor Grievances: 4 Investor grievances were received and resolved during 2015-16 and there was no outstanding complaint as on 31.3.2016;
- ii) Public Grievances: 69 cases received during FY2015-16. 61 cases were redressed.
- iii) Customer Grievance: Nil
- iv) Stakeholder grievances pertaining to any other issue are forwarded to the respective department for redressal.

The stakeholders may address their complaints via platforms given below:

Employee Grievance	<ul style="list-style-type: none"> • Grievance Redressal System • Whistle Blower Policy
Shareholder Grievance	At dedicated email id- investors_cs@hindustancopper.com
Trade Union Grievance	Bipartite Forum at Unit/National level for the Company
Consumers/Customers Grievance	Grievance Redressal through Marketing Department
Public in General	Public Grievance System of the Ministry

Principle 2: Products contributing to sustainability

Businesses should provide goods and services that are safe and contribute to sustainability throughout their life cycle.

1. List up to 3 of your products or services whose design has incorporated social or environmental concerns, risks and / or opportunities.

The Company operates and manufactures its products (e.g. refined copper cathode, continuous cast wire rods, copper concentrate) in such a manner as to protect the environment, interests of employees and general public.

2. For each such product, provide the following details in respect of resource use (energy, water, raw material etc.) per unit of product (optional):

- i. Reduction during sourcing / production / distribution achieved since the previous year throughout the value chain
- ii. Reduction during usage by consumers (energy, water) has been achieved since the previous year

The Company is committed to increased levels of recovery and recycling, as well as making investments in environment friendly technology/process to reduce energy intensity, toxicity and waste.

Energy Conservation: Energy consumption is constantly monitored at the mines, plants and townships with a view to achieve overall reduction. The table below shows the improvement in achievement in respect of power, fuel and recovery:

Item	Location	Achievement in 2015-16	Achievement in 2014-15
Power consumption (KWH/MT of ore)	Khetri Mine (KCC)	25.93	29.71
Power consumption (KWH/MT of ore)	Kolihan Mine(KCC)	19.88	21.81
Power consumption (KWH/MT of ore)	Malanjkhand Mine(MCP)	0.665	0.832
Power consumption in concentrator (KWH/MT of ore)	MCP	18.88	19.69
Fuel consumption (Lit/Mt of anode)	ICC	502	546
Recovery of Copper at concentrator (%)	MCP	92.16	89.91
Recovery of Copper at concentrator (%)	KCC	89.898	87.76

Water use efficiency: Used water is reclaimed and re-used in order to conserve water. Water is treated before discharging via treatment plants. The processes are also reviewed and modified so as to reduce the requirement of water from time to time. Partial recycling of treated effluent water is carried for horticultural purposes.

- 3. Does the Company have procedures in place for sustainable sourcing (including transportation)? If yes, what percentage of your inputs was sourced sustainably? Also, provide details thereof, in about 50 words or so.**

Sustainable sourcing: Before registering / approving any party, the Company scrutinizes carefully relevant documents to verify compliances of all pre-set norms including the environmental norms by the party. In case of major items, Company Officials visits their premises to evaluate all their capabilities including the environmental and social issues.

Logistics improvements: The Company has continued to follow multi-modal transportation which is not only efficient & cost effective, but also environmental friendly. Further, improvements over the years through sealing of containers has successfully reduced the amount of dust emitted thus reducing the pollution level as well as wastage.

- 4. Has the Company taken any steps to procure goods and services from local and small producers, including communities surrounding their place of work? If yes, what steps have been taken to improve the capacity and capability of local and small vendors?**

Yes, the Company procures products and services from local producers and communities surrounding its operations.

Suppliers, vendors participate in awareness creation programs, capacity building workshops that include sharing technical expertise, skill up-gradation and shop floor visits. Company trained the local unemployed person to produce goods like hand gloves which is consumed in the factory regularly.

- 5. Does the Company have a mechanism to recycle products and waste? If yes, what is the percentage of recycling of products and waste? (Separately as <5%, 5-10%, >10%). Also, provide details thereof, in about 50 words or so.**

Currently, the Company recycles less than 5% of its waste generated internally.

A good amount of copper bearing waste generated in TCP unit is recycled to HCL smelter plant. The copper waste of refinery and electrical workshop is also recycled back to smelter. The tailing of concentrator plant is partly backfilled in the mines. The Company sells the used oil, rubber scrap to the Government approved recyclers and these recyclers address environmental concerns while recycling or disposing the waste. A good amount of granulated copper slag (i.e. a waste of smelter plant) is sold for using as an alternative of sand blasting.

The Company has installed a pilot plant to recover valuable metals from the ore tailing, a waste generated from the concentrator plant.

- Scheduled replacement and preventive maintenance of equipment at Mines and Plants for efficient use of energy.
- Power factor improved and maintained near to unity.
- High wattage conventional lights were replaced by low power consuming LED lights
- Old filters were replaced with energy efficient modern ceramic filters
- VFDs were installed in casting wheels ,crane & conveyor belt at ICC Smelter.
- Low pressure burner in place of high pressure burner was installed in Flash furnace.
- Use of mine water in beneficiation circuit reduced running hours of river pump.
- Reciprocating compressor of drill machine was replaced with highly efficient screw compressor.

- Old inefficient motors replaced with premium class IE-3 energy efficient motors at ICC.
- 132 KW Rotoclone motor of concentrator plant was replaced by 110 KW motor.

New Technologies:

- Recovery of valuable metals from Copper ore tailing- a pilot plant has been installed and it is under operation at KCC.
- New Technology to recover nickel, pure copper and acid from the spent electrolyte of ICC refinery is under implementation and the plant is expected to be commissioned in 2016-17

R&D projects:

- Pilot scale study has been completed by M/s Outotec, Finland to extract copper from concentrate through hydrometallurgical route.
- Test work of three copper ore samples namely, ICC, KCC & MCP origin was completed by M/s GTK , Finland and it will be the basis for selection of technology for new concentrator plant.

Environment:

The Company has an Environment Management Plan, approved by the Board and it covers prevention, mitigation and control of environmental damages and disasters. An external party was engaged to conduct environmental audit and adherence to the recommendations are implemented and monitored by environmental cells on a periodic basis. The Company has resorted to extensive plantation around the mining and township areas at the units to maintain the green environment.

Waste management:

The Company sells its scrap/obsolete/surplus items through e-auction from time to time. Solid waste like granulated slag, waste bricks and boiler ash are sold to the intended party whereas tailings and waste rock are safely stored. The waste thus stored is reused, recycled or disposed in an environmentally acceptable manner.

6. Are the Emissions / Waste generated by the Company within the permissible limits given by CPCB / SPCB for the financial year being reported?

The ambient air quality is regularly monitored at mines, all process plants and residential areas at all the units. The air quality levels are well within the standards and limits prescribed by the Pollution Control Boards.

Effluent treatment facilities installed at the Units of the Company have been working satisfactorily and meeting regulatory norms as prescribed by the Pollution Control Boards. Discharged process water is being recycled after treatment thus conserving the water.

Solid waste from plants and hospitals is also safely disposed-off or stored as per guidelines prescribed by the Pollution Control Boards.
